# Manage Visiting Students with Ease

New Innovations continues to focus on developing a single system with the flexibility to execute a wide range of tasks, delivering even greater value to your institution.

Our latest premium feature for Visiting Student Onboarding makes it easier to include visiting students from various disciplines into your workflow, and so much more. This feature enables institutions to easily administer Checklists for scheduled students, unlocking the full potential of our software for those learners…just like residents and fellows, and without a second, manual process.

VISITING STUDENT ONBOARDING FEATURES

- Use Checklists to initiate onboarding and track the collection of trainee data, including demographics, contact information, immunization records, letters of good standing, certifications, proof of insurance, and more

- Gather and input demographic data and evaluate your institution on diversity practices

- Utilize Block Schedules to assign students to a particular rotation, and see them alongside your other learners if desired

- Use Assignment Schedules to create daily schedules for visiting students

- Include visiting students in your Evaluations to:
  - Gather assessments on their performance from faculty and residents
  - Gain insight into their experience at your institution and interacting with your personnel

Simplify Things…
with Checklists Featuring

E•SIGNATURE

× *Jason Benn*

[Accept and sign]

With Checklists, you can automate and improve the efficiency of your onboarding process by creating, distributing and attaching completed contracts to each trainee's profile. And, great news…this feature is already available to you within the New Innovations software!

New Innovations now offers a new premium E-Sign tool to help manage, track and expedite trainee contract signing between all parties inside and outside of your institution. Signees are able to view pending contracts electronically and sign them using a variety of methods to suit the device they may be using.

E•SIGNATURE FEATURES

- Improves expediency of resident contract cycle process
- Enhances security and authenticity
- Digital certification provided by third-party at the completion of every signed contract
- Enables signing inside the New Innovations software
- Eliminates need to download, sign and scan
- Provides a variety of signing options:
  - Use a finger or stylus on touchscreens
  - Use a mouse on traditional PCs
  - Upload an image file with a signature and apply it to specified contracts

To learn more about unlocking the full potential of our Checklists feature and E•Signature tool, including pricing, contact one of our sales associates at sales@new-innov.com
